Investment Objective

The investment objective of the Fund is to achieve long term capital growth. The Fund will invest, under normal market conditions, primarily in global equity securities of companies that are relevant to the investment theme of disruptive innovation – defined as the introduction of a technologically enabled new product or service that potentially changes the way the world works. The Investment Manager believes that companies relevant to this theme are those that rely on or benefit from the development of new products or services, technological improvements and advancements in scientific research relating to: Genomic Revolution Companies – the study of genes and their functions and related techniques. Industrial Innovation Companies – in energy, automation and manufacturing. Web x.0 Companies – the increased use of shared technology, infrastructure and services. Fin Tech Innovation Companies – technologies that make financial services more efficient. The Sub – Fund is classified as article 6 and analyses sustainability risk as part of its risk management process to enhance its long-term risk adjusted return but does not promote specific environment, social or sustainability characteristics within the meaning of the SFD Regulation. The fund is actively managed and Investors should read the KIID/PRIIPs documents and prospectus prior to investing. The Fund is not managed in reference to any benchmark and is shown for comparison purposes only.

Risk Considerations

Besides the risks included in the risk indicator under the Risk Information section, other risks may affect the fund performance.

Currency risk - in some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies.

Liquidity Risk - liquidity risk is the risk that a position cannot be sold, liquidated or closed at limited cost and/or in an adequately short time frame as required to meet liabilities of the Sub-Fund. This may occur when there are insufficient buyers and sellers in the market to trade the investments readily due to market events, large redemptions and/or if the sub-fund owns a sizeable portion of a company. When a sub-fund invests in smaller companies, shares in smaller companies may also be more volatile and more difficult to sell than shares in larger companies.

Deposits default risk - deposits and money market instruments are exposed to the risk that their issuer may not be able to meet its interest payment or principal reimbursement obligations.

Operational risk - due to issues such as natural disasters, technical problems and fraud.

Emerging markets risk - emerging markets may be exposed to political, fiscal and institutional instability that creates risks associated dealing, settlement, accounting, ownership, custody as well as liquidity (including the risk of internal or external embargos on the sale or acquisition of currencies and securities).
