## Fund objectives and investment policy

The fund aims to provide capital growth in excess of the MSCI China A Onshore (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of Chinese companies listed and traded in RMB on Chinese stock exchanges such as Shenzhen or Shanghai Stock Exchanges.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

## Share class performance (%)

## Risk considerations

**Concentration risk:** The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

**Counterparty risk:** The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

**Derivatives risk:** Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

**Emerging markets & frontier risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

**Higher volatility risk:** The price of this fund may be volatile as it may take higher risks in search of higher rewards.

**IBOR risk:** The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Market risk:** The value of investments can go up and down and an investor may not get back the amount initially invested.

**Onshore renminbi currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses. Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

**Performance risk:** Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

**Stock connect risk:** The fund may be investing in China "A" shares via the Shanghai:Hong Kong Stock Connect and Shenzhen:Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

## Synthetic risk & reward indicator (SRR)

**LOWER RISK**

Potentially lower reward

**HIGHER RISK**

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

## Risk statistics & financial ratios

	Fund	Target
<b>Annual volatility (%) (3y)</b>	24.2	23.1

## Information relating to changes in fund manager, investment objective, benchmark and corporate action information

---

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund's performance should be assessed against its target benchmark being to exceed the MSCI China A Onshore (Net TR) index and compared against the Morningstar China A Shares Category. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

### Benchmarks:

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

## Important information

---

### Costs

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.

### General

This document does not constitute an offer to subscribe for shares of Schroder International Selection Fund (the "Company").
