

# Invesco China Technology ETF

As of December 31, 2021

## Fund description

The Invesco China Technology ETF (Fund) is based on the FTSE China Incl A 25% Technology Capped Index (Index). The Fund will invest at least 90% of its total assets in securities that comprise the Index as well as American depository receipts and global depository receipts based on the securities in the Index. The Index includes constituents of the FTSE China Index and FTSE China A Stock Connect Index that are classified as information technology securities, including China A-shares and China B-shares. The FTSE China Index represents the performance of large and mid cap Chinese stocks included in the FTSE Global Equity Index Series universe. The FTSE China A Stock Connect Index is designed to represent the performance of eligible securities in the FTSE China A Index. The index is computed using the net return, which withholds applicable taxes for non-resident investors. The Fund and the Index are rebalanced quarterly.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](http://invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. As the result of a reorganization on May 18, 2018, the returns presented reflect performance of the Guggenheim predecessor fund. Invesco is not affiliated with Guggenheim. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. <sup>1</sup>The MSCI China Index is an unmanaged index considered representative of Chinese stocks. The index is computed using the net return, which withholds applicable taxes for non-resident investors.

#### Investment risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investing in securities of Chinese companies involves additional risks, including, but not limited to: the economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, allocation of resources and capital reinvestment, among others; the central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership; and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The performance of an investment concentrated in issuers of a certain region or country, such as China, is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments.

Investments focused in a particular sector, such as communication services and information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standards was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

The Invesco China Technology ETF has been developed solely by Invesco Capital Management LLC, and is not in any way connected to or sponsored, endorsed, sold or promoted by the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). FTSE Russell is a trading name of certain of the LSE Group companies. All rights in the FTSE Custom Emerging Ultra Dividend Revenue Index (the "Index") vest in the relevant LSE Group company which owns the Index. FTSE® is a trade mark(s) of the relevant LSE Group company and is/are used by any other LSE Group company under license. The Index is calculated by or on behalf of FTSE International Limited or its affiliate, agent or partner. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on or any error in the Index or (b) investment in or operation of the Invesco China Technology ETF. The LSE Group makes no claim, prediction, warranty or representation either as to the results to be obtained from the Invesco China Technology ETF or the suitability of the Index for the purpose to which it is being put by Invesco Funds.

#### Glossary

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

**Weighted Average Return on Equity** is net income divided by net worth.

**Weighted Market Capitalization** is the sum of each underlying securities market value.
